

JEEFI ANTI-ICE KART

Mobile Aircraft anti-icing application system

The JEEFI Anti-Ice Kart is a high-performance, mobile solution designed for efficient and reliable anti-icing applications on the ramp. Built for FBOs and operators who demand performance, reliability, and ease of use.

Up to 44 GPM SPRAYING SPEED

High flow rate for fast, efficient coverage.

Up to 115 PSI OPERATING PRESSURE

Built to handle high pressure for optimal spray performance.

3 NOZZLES OPTIMIZED COVERAGE

Even distribution for maximum protection.

50 GALLON TANK CAPACITY

Large capacity reduces refill stops and increases productivity.

SIMULTANEOUS FILL & SPRAY

Save time on the ramp with simultaneous filling while spraying.

BUILT FOR PERFORMANCE

Engineered for the demands of today's busy ramps, the JEEFI Anti-Ice Kart delivers power, portability, and efficiency in one compact system.

TYPICAL APPLICATION

Typically use about 20–35 Gallons to cover the following aircraft within 5–10 minutes.

Challenger 600

Challenger 300

Challenger 850

Falcon 900

Falcon 2000

Falcon 7X

DESIGNED FOR FBOs. BUILT TO DELIVER.

INCREASE EFFICIENCY

High flow rate and simultaneous fill & spray saves valuable time.

ENHANCE SAFETY

Consistent coverage helps ensure safer operations in winter conditions.

REDUCE COSTS

Lower fluid usage and reduced labor time improve your bottom line.

RELIABLE PERFORMANCE

Industrial-grade components built for durability and long-term use.

EASY TO USE & MAINTAIN

User-friendly design for smooth operation and minimal maintenance.

COMPACT & MOBILE

Maneuverable design fits easily on busy ramps.

READY FOR YOUR RAMP.
